Engineer at Seatrium, focused on SOC L2 investigations and incident response. I handle cases escalated by BlueVoyant's L1 team, investigate alerts in Microsoft Defender and Microsoft Sentinel, and take action to secure affected accounts.

PROFESSIONAL EXPERIENCE

Seatrium | Engineer

Jun 2025 - Present / SOC L2 investigation & incident response

- Handle L2 investigations for security cases escalated by BlueVoyant's L1 team, reviewing alerts and supporting incident response.
- Investigate alerts in Microsoft Defender and Microsoft Sentinel, examining relevant logs and activity to assess suspicious behavior and determine response actions.
- Perform account containment and remediation, including password resets, session revocation, and MFA authentication-method resets or revocation as required.
- Conduct firewall testing to support validation of network security controls.
- Support AWS security log validation in Microsoft Sentinel, using KQL for account-specific and time-bounded checks alongside cloud infrastructure teams.

Hungry Hub | Cybersecurity Analyst

May 2024 - Aug 2024 / AppServation Co., Ltd. · Bangkok, Thailand

- Integrated OWASP ZAP, GitHub Actions, and SonarQube into web and API security testing workflows.
- Built AWS Lambda and API Gateway workflows for security alert processing and categorization.
- Automated log analysis and report generation with Python and Shell scripts.

UBS AG | Insider Threat Risk Solution Developer

Jan 2024 - Apr 2024 / Singapore · Security analytics & development

- Developed user-activity anomaly detection using TensorFlow and scikit-learn, with feature engineering to improve detection quality.
- Built Python/Flask microservices backed by MySQL and optimized queries and caching.
- Integrated automated testing and vulnerability scans into GitLab CI/CD and Docker workflows.

Haiyang Xu

Experience, technical toolkit & education

EARLIER EXPERIENCE

W2 Industrial Services Hub | IoT & Web Development Intern

Aug 2020 - Feb 2021 / Singapore · Industrial IoT

- Connected industrial hardware to AWS IoT Core, Lambda, and DynamoDB for real-time data processing.
- Built React and Node.js dashboards to help technicians monitor equipment and operational data.

Singapore Indoor Farms | IoT & Web Development Intern

Aug 2020 - Feb 2021 / Singapore · Smart farming

- Connected sensors and backend services with AWS IoT Core, Lambda, and S3, and automated agricultural data processing.
- Built a React and Flask dashboard for sensor visualization and remote environmental control.

TECHNICAL TOOLKIT

Security operations: Microsoft Sentinel, Microsoft Defender, KQL, BlueVoyant case handling

Response & validation: Alert investigation, Identity remediation, Firewall testing, Cloud log validation

Cloud & automation: AWS, Python, Shell, GitHub Actions, GitLab CI/CD, Docker

Application & data: OWASP ZAP, SonarQube, Flask, React, MySQL, scikit-learn

EDUCATION

Singapore Management University

BSc in Computer Science | Aug 2021 - Dec 2024

Cybersecurity & Cyber-Physical Systems

Singapore Polytechnic

Diploma in Computer Engineering | Mar 2018 - Apr 2021

Computing, connected systems & engineering

CERTIFICATIONS

AWS Certified Solutions Architect | CompTIA Security+ | Certified Ethical Hacker (CEH)

HACKATHONS

Deep Learning Week (2022): AI pedestrian and vehicle detection.

Lyve Cloud Hackathon (2022): cloud-based media streaming server.
