EDUCATION

Singapore Management University, Singapore

Aug 2021 – Jan 2025

Bachelor of Computer Science (Cybersecurity & Cyber-Physical System)

- **Relevant modules** – IT Solution Lifecycle Management, Cyber Threat Intelligence, Internet of Things: Technology and Applications, Frontend & Backend Web Application Development

Singapore Polytechnic, Singapore

Mar 2018 – Apr 2021

Diploma in Computer Engineering

- **Relevant modules** - Server Management, Computer Networking, Cloud Architecting, Firewall Technologies
- **Honor:** SP EEE Director's Honor (Top 10% of cohort)

WORK EXPERIENCES

Seatrium Pte Ltd, Singapore

Jun 2025 – Present

Cybersecurity Engineer

- Perform Tier 2 security incident investigation and response by collaborating with an external Managed Threat & Threat Protection (MTTP) SOC, investigating Microsoft Defender XDR alerts involving compromised accounts, phishing, malware, endpoint threats, and suspicious network activity.
- Analyze Microsoft Entra ID Sign-in Logs and Audit Logs to validate security incidents, perform password resets, revoke user sessions, verify MFA configuration, and coordinate remediation with affected users.
- Conduct proactive threat hunting using Microsoft Sentinel and Kusto Query Language (KQL) to investigate security anomalies, validate endpoint telemetry, and support enterprise detection and response activities.
- Administer Microsoft security solutions by configuring Microsoft Purview DLP policies, managing Microsoft Defender Indicators for malicious IPs and file hashes, investigating phishing campaigns, and maintaining enterprise threat intelligence.

Hungry Hub (AppServation Co., Ltd.), Thailand Bangkok

May 2024 – Aug 2024

Cybersecurity Analyst Intern

- Automated vulnerability assessments using OWASP ZAP, GitHub Actions, and SonarQube.
- Developed Python automation scripts to improve security operations efficiency.
- Built AWS Lambda workflows supporting security alert analysis.

UBS AG, Singapore

Jan 2024 – Apr 2024

Insider Threat Risk Solution Developer

- Developed insider threat detection models using TensorFlow and Scikit-learn.
- Built Python Flask microservices with MySQL backend.
- Improved deployment efficiency using Docker and GitLab CI/CD.

CO-CURRICULAR ACTIVITIES AND LEADERSHIP EXPERIENCES

Deep Learning Week Hackathon, NTU, 2022

Sep 2022 – Aug 2022

Team Leader

- Led the development of an AI-based urban safety solution using deep learning for real-time pedestrian and vehicle detection.

Lyve Cloud Hackathon 2022

Mar 2022 – May 2022

Team Leader

- Developed a cloud-based media streaming solution for Seagate Lyve Cloud, enabling scalable real-time multi-client video streaming.

COMMUNITY SERVICE

ST LUKE'S ELDERCARE (CLEMENTI CENTRE, SINGAPORE)

Jul 2022 – Sep 2022

Volunteer

- Assisted elderly residents with daily activities, mobility support, and community engagement.

ADDITIONAL INFORMATION

- **Certification** – AWS Certified Solutions Architect Certification
- **Cybersecurity** – Incident Response, Threat Hunting, Microsoft Defender XDR, Microsoft Sentinel (SIEM), Microsoft Entra ID, Microsoft Purview DLP, Identity & Access Management (IAM), Email Security, Endpoint Security, Threat Intelligence, Kusto Query Language (KQL)
- **Tools** – Microsoft Defender XDR and Endpoint, Microsoft Defender for Office 365, Microsoft Sentinel, Microsoft Entra ID, Microsoft Purview, VirusTotal, AbuseIPDB, Docker, GitHub, GitLab CI/CD, Wireshark, MySQL
